Jan. 11, 2000.

Synopsis

Employees and others brought two personal injury actions against uranium mining and processing companies in Texas state courts. Companies removed the suits to federal court, where they were treated as related cases. The United States District Court for the Western District of Texas, [Orlando L. Garcia, J.](#), asserted jurisdiction under the Price Anderson Act over plaintiffs' objections, issued pre-discovery scheduling orders requiring plaintiffs to establish certain elements of their claims through expert affidavits, and subsequently dismissed the cases for failure to comply with the scheduling orders. Plaintiffs appealed. Consolidating the cases on appeal, the Court of Appeals, [Benavides](#), Circuit Judge, held that: (1) Price

Acuna v. Brown & Root Inc., 200 F.3d 335 (2000)

45 Fed.R.Serv.3d 746, 30 Env'tl. L. Rep. 20,296

Anderson Act conferred exclusive federal jurisdiction over the claims in this case, and (2) district court did not commit clear error or an abuse of discretion in issuing the subject *Lone Pine* orders.

Affirmed.

Procedural Posture(s): On Appeal.

Appeals from the United States District Court for the Western District of Texas.

Before GARWOOD, SMITH and BENAVIDES, Circuit Judges.

Opinion

BENAVIDES, Circuit Judge:

The above-captioned cases were consolidated on appeal. They present the common issue of whether jurisdiction in the federal courts is appropriate under the Price Anderson Act, 42 U.S.C. § 2210(n)(2), where plaintiffs have alleged tortious injury arising from uranium mining activity. Plaintiffs-appellants also appeal the imposition of certain pre-discovery orders and argue, in the alternative, that they satisfied any burdens placed upon them and that their cases should not have been dismissed. As discussed below, we find that jurisdiction was proper under 42 U.S.C. § 2210(n)(2) and that dismissal of the cases was proper.

I. Facts and Procedural History

Crecension Acuna and other plaintiffs, in total numbering over one thousand, brought suit in Texas state court against defendant companies for alleged personal injuries and property damage arising from defendants' uranium mining and processing activities. Rebecca Garcia and approximately 600 other plaintiffs brought suit alleging similar claims against a partially overlapping set of

defendants, most of whom were also engaged in uranium mining activities in another area of Texas.

In both cases, plaintiffs alleged that they were exposed to and injured by the defendants' *338 mining and processing activities. Some plaintiffs worked in uranium mines or processing plants, while others alleged exposure to radiation or uranium dust or tailings through contact with family members who worked in the mines or through environmental factors such as wind and groundwater. Plaintiffs alleged a range of injuries as well as durations and intensities of exposure.¹

Both suits were filed in Texas courts, alleging causes of action under state law. Defendants removed the cases to the federal district court for the Western District of Texas, where they were treated as related cases. Over plaintiffs' objections, that court asserted jurisdiction under the Price Anderson Act, 42 U.S.C. § 2210(n)(2). First in *Acuna* and then in *Garcia*, the court issued pre-discovery scheduling orders that required plaintiffs to establish certain elements of their claims through expert affidavits. Those affidavits had to specify, for each plaintiff, the injuries or illnesses suffered by the plaintiff that were caused by the alleged uranium exposure, the materials or substances causing the injury and the facility thought to be their source, the dates or circumstances and means of exposure to the injurious materials, and the scientific and medical bases for the expert's opinions.

In response to the order issued in *Acuna*, plaintiffs submitted just over one thousand form affidavits from a single expert, Dr. Smith. Those affidavits identified a series of illnesses and effects that can occur as a result of uranium exposure and stated that the relevant plaintiff suffered from some or all of them. The affidavits stated that Dr. Smith had reviewed the plaintiff's medical data and had come to the conclusion that exposure to uranium and its byproducts had reached clinically significant doses. The affidavits went on to list all of the mining facilities covered in the lawsuit as responsible for each plaintiff's exposure and routes of exposure as including inhalation, ingestion, and direct skin contact. The affidavits also included a list of scientific studies and materials.

The magistrate judge found that the affidavits did not comply with the scheduling order, reiterated some of the requirements of the order, and gave plaintiffs an additional month to comply. Plaintiffs then submitted additional affidavits by Dr. Smith and two other experts.

Acuna v. Brown & Root Inc., 200 F.3d 335 (2000)

45 Fed.R.Serv.3d 746, 30 Envtl. L. Rep. 20,296

Some individuals were identified in these affidavits as suffering from particular diseases but the other required information was not provided regarding their claims. The supplemental affidavits did not provide any new information regarding the specific claims of the vast majority of plaintiffs. The magistrate judge found that these additional affidavits still failed to meet the specificity requirements of the order and recommended that the case be dismissed. The district court issued a memorandum and order dismissing the case.

An identical pre-discovery order was issued some months later in *Garcia*. Plaintiffs in that case submitted only one affidavit by Dr. Smith, designed to cover all plaintiffs' claims. Following the magistrate judge's recommendation, the district court dismissed the case for failure to comply with the order. Plaintiffs in both cases appeal.

II. Analysis

A. Federal Jurisdiction

Plaintiffs in both cases contend that removal was improper under the Price Anderson Act. They argue that neither the statutory language nor Congressional intent confers federal jurisdiction over claims arising from uranium mining and related activities. Defendants counter that the Act was meant to create federal jurisdiction over all claims connected to the nuclear power and weapons industries, including the mining and processing of uranium.

*339 ^[1] ^[2] The district court's exercise of jurisdiction is reviewed de novo, see [Vasquez v. Alto Bonito Gravel Plant Corp.](#), 56 F.3d 689, 692 (5th Cir.1995), and doubts regarding whether removal jurisdiction is proper should be resolved against federal jurisdiction. See [Willy v. Coastal Corp.](#), 855 F.2d 1160, 1164 (5th Cir.1988). We find that the Price Anderson Act does confer exclusive federal jurisdiction over the claims in this case.

^[3] The Price Anderson Act sets up an indemnification and limitation of liability scheme for public liability arising out of the conduct of the nuclear energy and weapons

industries. The jurisdictional provision in question here, [42 U.S.C. § 2210\(n\)\(2\)](#), was amended in 1988 to expand jurisdiction. Previously, only those claims arising out of an "extraordinary nuclear occurrence" were subject to automatic federal jurisdiction. The section now reads, in relevant part:

(2) With respect to any public liability action arising out of or resulting from a *nuclear incident*, the United States district court in the district where the incident takes place ... shall have original jurisdiction without regard to the citizenship of any party or the amount in controversy. Upon motion of the defendant ... any such action pending in any State court ... shall be removed or transferred to the United States district court having venue under this subsection.

[42 U.S.C. § 2210\(n\)\(2\)](#). [42 U.S.C. § 2014](#) defines "nuclear incident" as encompassing any occurrence causing personal or property damage arising out of the toxic, radioactive, explosive, or other hazardous properties of atomic or byproduct materials.

Plaintiffs seek to limit Price Anderson's jurisdictional grant, relying on a lengthy exposition of the history of the Act and an intricate series of interpolations from definitions elsewhere in the legislation. Taken together, their arguments would posit the following: the jurisdictional grant contained in [§ 2210\(n\)\(2\)](#) is meant only to apply to singular, accidental events at a contract location subject to the indemnification portion of the Act that is not located in a state which regulates its own uranium industry pursuant to an agreement with the Nuclear Regulatory Commission [NRC]. Such a tortured interpretation is unnecessary and runs counter to the plain language of the statute as well as the Congressional intent behind the 1988 amendment of [§ 2210\(n\)\(2\)](#).

^[4] ^[5] There is nothing in the definition of "nuclear incident" which suggests it should be contingent on whether the occurrence took place in a state which regulates its own uranium industry under NRC guidelines

Acuna v. Brown & Root Inc., 200 F.3d 335 (2000)

45 Fed.R.Serv.3d 746, 30 Env'tl. L. Rep. 20,296

or whether the facility is covered under the separate indemnification portions of the Act. “Nuclear incident” is not limited to a single, catastrophic accident: indeed, one purpose behind the 1988 amendments was to expand the scope of federal jurisdiction beyond actions arising from “extraordinary nuclear occurrences” only. See [Kerr–McGee Corp. v. Farley](#), 115 F.3d 1498, 1502 (10th Cir.1997). Plaintiffs’ attempts to reintroduce the limitations of “extraordinary nuclear occurrence” into the 1988 amendments’ substitution of “nuclear incident” rely on faulty statutory interpretation and are contrary to Congressional intent. See [Carey v. Kerr–McGee Chem. Corp.](#), 60 F.Supp.2d 800, 803–07 (N.D.Ill.1999) (analyzing history and impact of [§ 2210\(n\)\(2\)](#) and refuting the same arguments made by plaintiffs in the instant case contained in [Gilberg v. Stepan Co.](#), 24 F.Supp.2d 325 (D.N.J.1998)).

^[6] Courts that have considered the general question of the scope of jurisdiction under the 1988 amendments have found that Congress intended to create an exclusive federal cause of action for torts arising out of nuclear incidents. See, e.g., [Roberts v. Florida Power & Light Co.](#), 146 F.3d 1305 (11th Cir.1998); [In re Three Mile Island II](#), 940 F.2d 832 (3d Cir.1991).

*340 ^[7] Uranium extraction and processing are part of the nuclear weapons and power industries, and therefore come within the ambit of [§ 2210\(n\)\(2\)](#). See [Nieman v. NLO, Inc.](#), 108 F.3d 1546 (6th Cir.1997) (Act creates federal cause of action for continuing trespass from a uranium processing plant); [Kerr–McGee Corp. v. Farley](#), 115 F.3d 1498 (10th Cir.1997) (Act would preempt state suit for injuries arising from uranium mining and processing). Cf. [In re Cincinnati Radiation Lit.](#), 874 F.Supp. 796, 832 (S.D. Ohio 1995) (injuries resulting from medical experimentation with radiation not intended to come under [§ 2210\(n\)\(2\)](#)). The district court’s exercise of removal jurisdiction under [42 U.S.C. § 2210\(n\)\(2\)](#) was proper.

B. Pre-trial Procedure in the District Court

^[8] ^[9] Plaintiffs contend that the pre-discovery orders requiring expert support for the details of each plaintiff’s claim imposed too high a burden for that stage of

litigation. In the alternative, they argue that they in fact complied with the orders and that their cases should be remanded for discovery and trial. The district court’s dismissal of plaintiffs’ claims in *Garcia* is reviewed for plain error, because plaintiffs did not make a timely objection to the magistrate judge’s recommendation of dismissal. See [Douglass v. United Services Automobile Ass’n](#), 79 F.3d 1415, 1424 (5th Cir.1996) (en banc); see also [Crawford v. Falcon Drilling Co., Inc.](#), 131 F.3d 1120, 1123–24 (5th Cir.1997). Plaintiffs did file an objection in *Acuna*, and the district court therefore conducted a de novo review of the recommendation to dismiss. We review the district court’s dismissal order under Fed.R.Civ.P. 16(f) for abuse of discretion. See [National Hockey League v. Metropolitan Hockey Club, Inc.](#), 427 U.S. 639, 642, 96 S.Ct. 2778, 49 L.Ed.2d 747 (1976); [FDIC v. Conner](#), 20 F.3d 1376, 1380 (5th Cir.1994).

^[10] The pre-discovery orders in issue are of a type known as *Lone Pine* orders, named for [Lore v. Lone Pine Corp.](#), 1986 WL 637507, No. L–33606–85 (N.J.Super.Ct.1986). *Lone Pine* orders are designed to handle the complex issues and potential burdens on defendants and the court in mass tort litigation. In the federal courts, such orders are issued under the wide discretion afforded district judges over the management of discovery under Fed.R.Civ.P. 16.

^[11] In these two cases, treated as related in the district court, there are approximately one thousand six hundred plaintiffs suing over one hundred defendants for a range of injuries occurring over a span of up to forty years. Neither the defendants nor the court was on notice from plaintiffs’ pleadings as to how many instances of which diseases were being claimed as injuries or which facilities were alleged to have caused those injuries. It was within the court’s discretion to take steps to manage the complex and potentially very burdensome discovery that the cases would require. See [Landry v. Air Line Pilots Ass’n Int’l AFL–CIO](#), 901 F.2d 404, 436 (5th Cir.1990); [Fournier v. Textron, Inc.](#), 776 F.2d 532, 534 (5th Cir.1985) (noting district court’s authority to manage and develop complex litigation discovery).

The scheduling orders issued below essentially required that information which plaintiffs should have had before filing their claims pursuant to Fed.R.Civ.P. 11(b)(3). Each plaintiff should have had at least some information regarding the nature of his injuries, the circumstances

For Educational Use Only

Acuna v. Brown & Root Inc., 200 F.3d 335 (2000)

45 Fed.R.Serv.3d 746, 30 Env'tl. L. Rep. 20,296

under which he could have been exposed to harmful substances, and the basis for believing that the named defendants were responsible for his injuries. See [Beanal v. Freeport–McMoran, Inc.](#), 197 F.3d 161, 165 (5th Cir.) (plaintiff's complaint is insufficient where it is devoid of "names, dates, locations, times, or any facts that would put [defendant] on notice as to what conduct supports ... his claims"). The affidavits supplied by plaintiffs did not provide this information. The district court did not commit clear error or an abuse of discretion in refusing to allow discovery to *341 proceed without better definition of plaintiffs' claims.

III. Conclusion

We find that the Price Anderson Act, [42 U.S.C. § 2210\(n\)\(2\)](#), conferred federal jurisdiction over the cases before us and that removal was therefore proper. We also find that the district court's pre-discovery orders and orders of dismissal were not abuses of its discretion. We therefore AFFIRM the judgments of the district court.
